

Audeze Mobius

Best Wireless Gaming Headset for PC

- UK readers

Audeze Mobius

If you can afford them, the Audeze Mobius ([read our review](#)) is the best (mostly) wireless gaming headphones we've used. Don't fret though, because the \$400 price tag is mated to a phenomenal pair of cans. When connected with a [gaming PC](#), this gaming headset really comes to life, giving you phenomenal 3D surround sound that changes subtly as you turn your head.

The Mobius offers some of the best sound of any gaming headset available today, and thanks to the sheer number of connectivity options they're incredibly versatile too. Maybe best of all, their understated design makes it easy to wear outside of your living room.
